

Exam 1

1. (40 points) Starting from the general form of the Schoedinger equation for the radial wave function obtain the solution for the case of Hydrogenlike atom.

2. (10 points) Calculate R_{10}

3. (20 points) Calculate R_{20}

4. (10 points) Calculate R_{21}

5. (20 poins) Calculate RMS radius of the R_{10} and R_{20} states.
