

## About These Faunal Data Files

These Excel files contain taxon occurrence data for fossils collected by the Panama Paleontology Project (PPP, web site [www.fiu.edu/~collinsl](http://www.fiu.edu/~collinsl)). The fossils are primarily from stratigraphic units on the Caribbean side of Panama and Costa Rica. The files were submitted by authors of chapters in the following book:

Laurel S. Collins and Anthony G. Coates (Editors). 1999. A Paleobiotic Survey of Caribbean Faunas from the Neogene of the Isthmus of Panama. *Bulletins of American Paleontology*, no. 357, 351pp.

Numbers across the top are PPP numbers, which are given to sites visited by the PPP. If you have any questions about the files or the project, contact Laurel Collins at [collinsl@fiu.edu](mailto:collinsl@fiu.edu).
