## Worksheet 2 - MAC 2311, Fall 2013

1. Decide whether the following statements are true or false. Briefly justify your answer.
(a) for every real number $x, x^{2}<100$
(b) for every real number $x, x^{2}>-1$
(c) there exists a real number $x, x^{2}<1$
(d) for every real numbers $x, y, x^{2}>y$
(e) for every real number $x$, there exists a real number $y$ so that $x^{2}<y$
(f) for every real number $y$, there exists a real number $x$ so that $x^{2}<y$
(g) for every positive real number $y$, there exists a real number $x$ so that $x^{2}<y$
2. Write the $\epsilon, \delta$ definition for $\lim _{x \rightarrow a} f(x)=L$.
(a) Use the $\epsilon, \delta$ definition to prove $\lim _{x \rightarrow 2}(2 x+3)=7$;
(b) Use the $\epsilon, \delta$ definition to prove $\lim _{x \rightarrow 5}(100 x-1)=499$;
(c) Use the $\epsilon, \delta$ definition to prove $\lim _{x \rightarrow 3} \frac{1}{x}=\frac{1}{3}$;
