

Food for thought – Photosynthesis name _____

1. Plants can make their own food from the sun's energy, water, and air (oxygen) using a process called photosynthesis (pho-to-syn-the-sis!). What food do they make?

2. Where do animals get their energy to live (their food)?

3. Which of the following foods do you like that are made by and from plants? (circle all that you like)

chocolate bread carrots apples cereal

potato juice corn popcorn peanuts

grapes oranges candy chips pancakes

4. How many words can you make using the letters in photosynthesis?
