History of Manga

- “Random or whimsical pictures”
- Developed from woodblock printed books
- Militarism of 1930’s
- Post WWII saw rise of Osamu Tezuka
- 1970s movement towards realism
- 1970s rise of anime
Manga vs Comics

- Cheaper paper, much thicker books
- Very affordable magazines with feedback channels – arguably the world’s biggest focus group
- Money made through serializing popular comics
- Over 1.3 billion manga published every year, ~30% of all books published in Japan
Stylistic & Technical Attributes

- Cutting the number of drawings or holding drawings for longer periods of time
- Recycle pieces of animation
- Done also to place more focus on the dramatic sense and appeal of the original story
- Scrolling or repeating backgrounds
- Still shots of characters in action poses sliding across screen
- Dialogue where only the lips move
- In 1960, 60% of all anime were based on character driven stories from manga
Character Design - Body Proportions

- Proportions emulated in anime come from proportions of the human body.

- The height of the head is considered as the base unit of proportion.

- Head heights can vary as long as the remainder of the body remains proportional.
A common approach is the large eyes style drawn on many anime and manga characters.

Osamu Tezuka, who is believed to have been the first to use this technique, was inspired by the exaggerated features of American cartoon characters such as Betty Boop, Mickey Mouse, and Disney's *Bambi*. 
Character Design - Facial expressions

- Extremely exaggerated expression to show Shock!
